QUESTIONS FOR CLASS DISCUSSION: MATH 351

FALL 2018

"Notice all the computations, theoretical scribblings, and lab equipment, Norm. ... Yes, curiosity killed these cats."

- 27 August videos (Abbott & Costello, Colbert, Ramanujan summation)
- 29 August real number system; closure properties of sets with a binary operator
- 31 August monotone sequences; Completeness Property of R; convergence

of
$$\left\{ \left(1 + \frac{1}{2^n}\right)^{2^n} \right\}$$
; combinations

<u>5 September</u> binomial theorem; Euler's number; equivalence relations

- <u>7 September</u> notation (ε close, for large n); limits of sequences
- 10 September K- ε principle; more on limits
- 12 September limits, continued
- 14 September error term analysis
- <u>17 September</u> laws of limits; subsequences
- 19 September squeeze theorem
- <u>21 September</u> location theorems; subsequences
- <u>24 September</u> subsequences; nested interval theorem
- <u>26 September</u> nested intervals, subsequences, continued
- 28 September practice test review
- 1 October Test I
- 3 October cluster points, Bolzano-Weierstrass theorem
- <u>5 October</u> Bolzano-Weierstrass, Cauchy sequences
- 10 October Cauchy sequences; supremum, infimum of a set
- 12 October Completeness theorem; intro to lim sup
- 15 October Continuity
- 17 October lim sup, lim inf, introduction to series
- 22 October Test II
- <u>24 October</u> series (ratio and root tests; asymptotic convergence test; integral test; Cauchy's test)
- <u>26 October</u> power series and intro to functions
- 29 October functions
- 31 October continuity; limits
- <u>2 November</u> functions of one variable; continuity; limits; sequential continuity
- 5 November limit theorems; sequential continuity
- 9 November Bolzano's theorem

- 12 November Bolzano's theorem; IVT
- 14 November Compactness; Extreme Value Theorem
- <u>16 November</u> Maximum theorem; continuous mapping theorem; review for test 3
- 19 November Test III
- 26 November mappings; uniform continuity
- 28 November metric spaces

Work! God wills it. That, it seems to me, is clear.

- Gustave Flaubert (letter to Louise Colet, 1845)
