

MATH 162 CLASS DISCUSSION

9TH MARCH 2020

TAYLOR POLYNOMIALS, TAYLOR SERIES

1. Find the 5th degree Maclaurin polynomial of e^{3x} .
2. Find the 4th degree Maclaurin polynomial of $(1 - x)e^x$.
3. Find the 3rd degree Taylor polynomial of $\frac{1}{1+x^2}$ centered at $c = 1$.
4. Find the 5th degree Maclaurin polynomial of $\frac{3x - \sin(3x)}{x^3}$.
5. Find the first four *non-zero* terms of the Maclaurin series of $\exp(x^2 + x)$.

6. Write the Maclaurin series expansion for $\frac{x}{1+x^2}$ and for $\ln(1+x^2)$. Find the interval of convergence for each series. What is the relationship between these two series?
7. Using an appropriate power series expansion, compute $\sum \frac{n}{7^n}$.
(Hint: Differentiate an appropriate geometric series.)
8. Find the Maclaurin series of each of the functions:
 $2/(3-x)$, $5/(4-x)$, and $(23-7x)/[(3-x)(4-x)]$.
9. Find the 99th derivative of $1/(a-bx)$ by using an appropriate power series.
10. Find the *binomial expansion* of $(1+x)^{-4}$. What is its radius of convergence?
11. Find the Maclaurin series expansion of $1/(1+x^2)^{1/2}$.
12. Find the 23rd derivative of $1/(1+x^2)^{1/2}$.
13. Using an appropriate Maclaurin series, evaluate the limit of $\frac{\sin x - \tan x}{x^3}$ as $x \rightarrow 0$ without using l'Hôpital's rule.
14. Evaluate the limit of $\frac{\ln x}{x-1}$ as $x \rightarrow 1$ without using l'Hôpital's rule.
15. Evaluate the limit of $\frac{1}{\sin x} - \frac{1}{x}$ as $x \rightarrow 0$ without using l'Hôpital's rule.
16. Evaluate the limit of $\frac{\sin x - x}{\tan x - x}$ as $x \rightarrow 0$ without using l'Hôpital's rule.
17. Evaluate the limit of $\frac{\ln x}{e^x - e}$ as $x \rightarrow 1$ without using l'Hôpital's rule.
(Hint: Let $t = x - 1$.)
18. Find $\lim_{x \rightarrow 0} \frac{e^{x^2} - 1}{\cosh(3x) - 1}$ without using l'Hôpital's rule.
19. State Taylor's inequality. Using this inequality, prove that the Maclaurin series of e^x , $\sin x$, $\cos x$, and $\cosh x$ each converge to the given function everywhere.

[Colin Maclaurin](#) (1698 – 1746)

[Brook Taylor](#) (1685 - 1731)
