

Optional Extra Credit Homework (EC#2)

Hard copy submissions (printed out and turned in) are due at 8.30am on Tuesday 4/06

Participating students are work on this assignment alone. Since this is an extra credit assignment, no assistance will be provided by Dr. O'Brien, but students may consult any actual or on-line book.

Assignment: Read Chapter 9 (pp. 291-302) in the textbook, and solve as many of the five problems given on pp.302-3. As always, list all needed assumptions (if any), show all work, and give any conclusions in clear, thorough, and succinct English.

Grading: Maximum grade: up to **5 percentage points** will be added to the final homework average used to calculate the final course grade.
